# Slick Trace investigation report — case_0001

Generated 2026-09-25T17:37:39.442535+00:00 · reproducible investigation report

**What this document is not.** This is not a court-ready dossier, a legal finding, or an accusation. It records what the system computed and under which assumptions.

## Finding

**Leading candidate: 419336692**. This is a ranking by physical consistency under tested assumptions — an investigative lead for a human analyst, not proof of responsibility.

## Scene

| Field | Value |
|---|---|
| Incident | case_0001 |
| Acquired (UTC) | 2026-09-10T04:30:00+00:00 |
| Sensor | synthetic SAR-like (VV proxy, single channel) |
| Data status | synthetic |
| Pixel spacing | 433.59 m |
| Label source | generator ground truth (synthetic) — not a human or independently confirmed label |

## Evidence layers

| Layer | Provenance |
|---|---|
| AIS | synthetic (fictional MMSIs; no real broadcast data) |
| Forcing | slicktrace_core.synth_generator constant+spatial field v0.2 |
| Licence | Synthetic data generated by this repository; released under the repository licence. No third-party data terms apply. |

## Traffic filtering

| State | Vessels |
|---|---|
| unassessed | 3 |
| candidate | 3 |

Unassessed is reported separately from excluded: missing evidence is not exoneration, and collapsing the two would silently convert one into the other.

## Rank fragility

Leader retained in 1.0 of 80 tested perturbations. No tested perturbation changed the leader.

Absence of a flip is evidence of stability across the tested set, not a proof of stability: single-axis and two-axis perturbations only.

## File integrity

| File | SHA-256 (first 16) |
|---|---|
| attribution_result.json | ecebe1c3883ec9b8 |
| coverage_result.json | b21bb5f3f024d263 |
| forcing.npz | eae171037b53ea6b |
| forecast_result.json | 7da558096917d392 |
| fragility_result.json | af0ff8468cdcc124 |
| historical_mapping.json | abf10462ec4d8886 |
| manifest.json | a3930aa6a09a2f1a |
| mask_groundtruth.png | 4617be9267674a8f |
| naive_baseline_result.json | e67584eaffda69aa |
| next_observation_result.json | a49e5b0ca83cea41 |
| scene.png | 053b188031c45f22 |

Hashes verify file integrity only. They do not establish that an observation is true, that a label is correct, or that this analysis is legally sufficient.

## Uncertainty

• Rankings express physical consistency under tested assumptions. They are not proof of responsibility.

• Ensemble and perturbation-grid win frequencies are evidence scores, not calibrated probabilities. No calibration against held-out real outcomes exists.

• Where no candidate clears the absolute fit gate the system reports unknown source rather than naming the least-bad option.

• Synthetic ranking accuracy is not a measurement of real-world attribution accuracy.

**Restated.** This is not a court-ready dossier, a legal finding, or an accusation. It records what the system computed and under which assumptions.
